

View of concrete and brick containment around an acid pump. Note the severe deterioration.

Spray applied ENDURA-TUF® ET-2000 composite system eliminates the need for sacking with cement-type grouts or hand applied epoxy fillers. ET-2000 is self priming and has excellent build-ability and hang characteristics.

ENDURA-TUF® ET-2000 is resistant to a wide variety of liquids and gases and offers exceptional impact resistance. ET-2000 is ideal for secondary containment of liquid chemicals and primary containment of water and waste water service.
