

View of direct-to-concrete application of EF-1990 for secondary containment in a manufacturing facility utilizing plural component spray equipment.

EF-1990 applied direct-to-concrete for secondary containment of chemicals. EF-1990 can be applied as a standard solid lining material or as an expanded film utilizing ECOSYSTEM[®] expansion technology for effective materials cost reduction.

View of EF-1990 applied as a secondary containment lining system for electrical transformers. For impact resistance, EF-1990 can be applied utilizing ENDURATUF[®] ET-2000 technology that allows for the injection of sand fillers into the spray-applied system.
